

Ceetak announce launch of new WRAS approved compounds

Ceetak Ltd, one of the UK's leading designers and manufacturers of seals and sealing solutions are pleased to announce the approval and release of three new compounds under the Water Regulations Advisory Scheme.

The new compounds are 60, 70 and 90 shore hardness EPDM (Ethylene Propylene Diene Monomer) and are approved for use in both cold and hot water, up to 85°.

Many different seal types are available for manufacture; from BS1806 o-rings, to specially designed, bespoke rubber mouldings and gaskets – Ceetak's team of experienced technical engineers are on-hand to offer practical advice and assistance on design solutions.

Alongside the new WRAS approved materials, Ceetak also offer a wide range of NSF51 and NSF61 approved compounds for use in food and potable water industry applications.

Ceetak's extensive range of compounds are suitable for many water-related industry applications, examples of which include water metres, pumps and boilers, taps and showers, valves and ball cocks, and pipes and fittings.

For further information on Ceetak's WRAS and NSF approved compounds, and seal manufacturing capabilities, please call: +44 (0) 1234 832200
